Department of Education

Road Safety and Drug Education - Reflecting on Practice

Event date range

2 December 2026 (09:00 AM to 03:00 PM)

Event details

This practical workshop provides dedicated time for schools to reflect on current practice, review curriculum planning and identify priorities for improving road safety and drug education.

Participants revisit the Framework for Effective Practice to reflect on their school's progress across the five interconnected domains, recognise existing strengths and identify areas for further development.

Dedicated planning time enables participants to

review and refine Health curriculum planning for road safety and drug education, considering curriculum coverage, sequencing, teaching and learning resources, and their individual school context.

Through facilitated reflection and collaboration, participants share practice, explore challenges and identify achievable next steps to support ongoing implementation and improvement within their schools.

All costs are covered through funding from the Road Safety Commission and Mental Health Commission.

Teacher relief funding may also be available to support school

participation. Please contact the Road Safety and Drug Education Branch for further information.
